

6-3-1 Nutrient

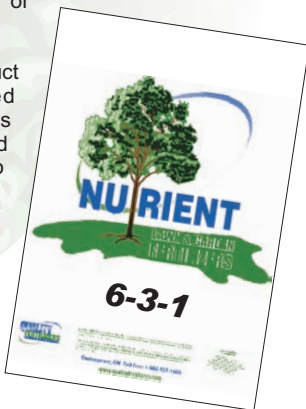

Guaranteed Minimum Analysis

Total Nitrogen	6%
Water Insoluble Nitrogen	5%
Available Phosphoric Acid (P ₂ O ₅)	3%
Soluble Potash (K ₂ O)	1%
Organic Matter	60%
Guaranteed Maximum Moisture Content ...	12%

6-3-1 is an excellent source of nutrients and is over 60% organic matter. These nutrients are a slow release which is ideal for season long feeding of your lawn or garden.

The **6-3-1** is a product derived from dried yeast and microbes which will not only add nutrients but also biological benefits to your lawn or garden.

This product is granulated to allow for easy application and does not contain any animal bi-products or weed seeds.

According to customers using the product on their lawns, a spring, summer and fall application of about 10kgs per 100 sq. meters per application is ideal to produce a healthy green lawn. For garden use, an application rate of 0.5-1kg/10sq meters worked into the soil twice a year is ideal.

6-3-1 is available in 10kg and 20kg bags.
